Here and There

Canadian bond sales during the week ending August 30th amounted to \$208,579, which brings the total for the year up to \$247,059,160. Of this sum \$108,335,827 represents the value of bonds sold in Canada; \$77,978,333 in the United Kingdom, and \$116,745,000 in the United States.

The port of Montreal is well on its way this season to beat all previous records for tonnage received as statistics, obtained from the Harbor Commissioners' office, show that there is a big increase in the number of ships berthed in the port to date, as compared with the number for the same date last year. Up to August 8, 608 boats had docked here and their total tonnage was 1,086,466, while up to August 13, 1924, only 537 vessels had tied up here since the opening of navigation of the 1924 season, and their tonnage was 1,801,367.

One notable feature of the tourist season in the Canadian Rockies this summer has been the demand for saddle horses, according to J. M. Gibson, secretary of the Trail Riders, who recently returned to Montreal from the west. The practice is growing of sending the horses in advance to points where the trail crosses a motor road and thus one commences one's ride at a point thirty or forty miles from where headquarters. Thus the great cavalcade of over one hundred riders who participated in the recent three-day cross country "ride between Marble Canyon on the Banff-Windermere Highway, to Wapta Bungalow Camp on the Canadian Pacific Railway, was made possible and convenient as it took only two hours to convey the riders from Banff and Lake Louise by motor bus to the points of departure.

Under the heading, "The Incapacities of Men," G. B. Fletcher contributes the following interesting remarks on "Freight rates to the August 'Railway Review'."

"Man's progress is measured by his adaptability to his surroundings and his opportunity to trade with his fellow men by exchanging products. Transportation is the essential instrumentality for trade, commerce or business of any kind.

"The phenomenal prosperity of the United States today is the direct result of the most efficient transportation facilities in the world — railroads.

"Railroad transportation is worth ten times what it costs today to every person in this nation. The railroads haul your meat 500 miles for 36 cents a hundred pounds, you pay from 20 cents for cheap cuts to 60 cents for special cuts of meat or from 60 to 180 times the cost of transportation.

"The railroads haul flour 400 miles for 15 cents a hundred, 7 pounds for one cent. You pay 10 cents a pound for bread or 70 times the cost of transportation.

"You pay one dollar for a meal at a first class hotel on which the freight charges were less than two cents, including everything served and the coal to cook it, and then tip the waiter ten cents, or five times what the railroad received for hauling it 400 miles or more.

"The same man who tips the waiter ten cents will go out and make a speech and complain of high freight rates which are not one-fifth of the amount of his tip.

"Consistency, thou art a jewel!"

Subscribers are asked to look at their address labels and renew their subscription promptly if in arrears.

Big Sugar Beet Crop

Harvesting of Alberta's first sugar beet crop in the irrigated districts in the south for the new sugar beet factory at Raymond is commencing. The crop is a large one and is expected to average 15 or 16 tons to the acre throughout the district, which will give a total harvest of more than 100,000 tons. The factory at Raymond will open for operations shortly. Some farmers expect to get as high as 25 tons to the acre.

Wheat Pool Grows

The Alberta Wheat Pool is adding an average of 4000 acres each day to the total acreage involved in the pool for the 1925 crop according to an announcement from pool headquarters. In one day in the past week 8000 acres were added.

Big Oil Company To Operate in Alberta

The famous Dutch Shell Oil company, with activities all over the world, and in which the British government is a heavy shareholder, has decided to enter the Canadian field. This word comes from Ottawa in the latest copy of the official Canadian Gazette, announcing the incorporation of a million dollar Canadian Shell Oil Development company. It is the foremost of big developments in the oil fields of Western Canada where the Shell people have had an eminent geologist, John Irving Moore, investigating the geological structures in Alberta for the last two months.

Cutting and Threshing In One Operation

E. G. Cook, M. L. A., Pincher Creek, is cutting and threshing his wheat crop with one operation. He uses a machine drawn by eight horses, cuts a swath fifteen feet wide, and covers 30 to 40 acres daily, employing two men, one to drive horses and the other to look after the threshing machine which is operated by a 25 h.p. motor. Only enough straw is cut to get all the heads. This is elevated and dropped into the threshers. Tank wagons follow the machine to take the wheat stream. Mr. Cook claims he saves about 15 cents a bushel by this method.

Many Autos Registered

More than 32,000 cars are in operation in Alberta this year, compared with something over 47,000 in 1924. Total receipts from car licenses thus far this year have been \$912,000, compared with \$845,000 for the entire year of 1924.

Local Sportsman Have Good Day

Fine sunny weather favored local nimrods who spent a day with the birds yesterday. A party of town business men, who left before dawn, returned in the evening with a good bag.

Ladies Winter Coats

We expect to arrive Friday a number of

Ladies Winter Coats

We have these on ten days approval direct from our manufacturer in the east and are able to offer them at very close prices. If you intend to get a coat, look this stock over.

We also have for this week only a number of Ladies' Flannel Dresses. These have proved good sellers and are exceptionally good value at prices from \$5.50 to \$15.00.

Our shipment of Ballantyne Sweaters is here and open for your inspection. We could buy cheaper sweaters but we find Ballantyne's give the very best service. Ladies' and Men's goods moderately priced.

For quick sale—one rattling good Ford Touring Car at \$125.00 (license included)

S. A. MILLER

We are carrying an immense stock of
Building Material
for your convenience.

No. 2 Special Shingles for \$4.55 per M.

Half-screens for windows, worth \$1.45, while they last 50 cents each.

We rent out 30 ft. timbers for moving buildings.

Get what you require while our stock is complete.

BEAVER LUMBER COMPANY LIMITED

AND A HUNDRED OTHERS

OYEN THEATRE

Friday-Saturday, September 18-19

Lewis Stone, Helen Chadwick and Mary Carr
heading an unusually strong cast, in

"WHY MEN LEAVE HOME"

One of the most astounding Comedy-Dramas of the year. Full of heart interest and big laughs. A screen picture that teaches wives and sweethearts how to find and keep love. A show you will enjoy immensely.

Good Time Dance after show, Saturday

Monday-Tuesday, September 21-22

BEBE DANIELS in

"THE CROWDED HOUR"

One of the Paramount successes, in which the scene is first laid in New York, and afterwards in the battle fields of France where the heroine goes through some very exciting experiences.

Patrons are asked to note that all shows start at 8 p.m. Commencing Friday September 25, we will show two reels of an exceptionally good serial picture, and every Friday and Saturday following until all episodes have been shown.

DOMINION LOAN SETS A RECORD FOR FINANCING

Toronto.—Judging by orders received for the Dominion loan, 1925 has almost set a record for successful government financing. Orders for financial institutions have been larger than in either of the previous two years. Loans, each of which was recorded as so highly successful. Had all the orders received from institutions been accepted in full, only a small amount of bonds would have been available for other classes of investors. It is understood, however, that the large orders have been scaled down by the syndicate to the extent of more than 50 per cent., and, as a result, more than one-half of the loan will be available to the smaller private buyers. In adopting this plan, the syndicate has followed its policy for successful financing, as far as possible, to fill orders from private investors, and to secure a coast to coast distribution of the new loan.

It is a fact that a new Dominion loan brings out a certain class of investor who will allow his funds to remain idle for several months previously. The reception accorded the new loan is a tribute to the financial stability of Canada and Canadians. The fact that Canada has proven herself fully capable of financing her own requirements plays an important part in strengthening Canada's credit abroad that her securities are in demand in the principal money markets of the world.

Heads Grain Exchange

Officers Elected at Winnipeg for the
Eating Year
Winnipeg.—J. C. Macdonald, manager of the Western Elevator Company, was elected president of the Winnipeg Grain Exchange for the term of 1925-26, at the annual meeting of the exchange members. A. Thompson, manager of the International Elevator Company, and N. J. Brown, western manager of the Lake of the Woods Milling Company, were chosen vice-presidents. Dr. Robert H. Hagg was returned as secretary by acclamation.

The executive council of committees were also selected.

British Subjects Only

Government of Western Australia Will
Not Employ Foreigners
Perth, Australia.—The Government of Western Australia, having learned that foreigners had secured a large proportion of the work offered in the new department of public works, has decided that in future any money advanced to settlers by the Agricultural Bank of Western Australia shall be made on the condition that only British subjects shall be employed.

They With Wheat Pool
Winnipeg.—The appointment of H. H. Hoag, M.P. for Springfield, to the position of assistant director of the newly formed department of public works and education of the Manitoba Wheat Pool, was announced. Mr. Hoag's resignation from political life was forewarned in a Canadian Press dispatch.

Deserabara Peasants On Trial
Vienna.—The Abende says it learns that 500 Deserabara peasants are on trial at Kishinev, Rumania, before a military tribunal. They were arrested by a Rumanian punitive expedition following discovery of an alleged plot to deliver Deserabara over to Soviet Russia.

Fruit Houses Amalgamated
Winnipeg.—J. A. Simington, Minneapolis, director of the Nash Fruit Company in Western Canada, has announced a previous announcement that the Nash companies had been amalgamated under the name of the Nash-Simington Company.

Increased Unemployment in Britain
London.—Unemployment in Great Britain continues rapidly to increase. The report for August 31 shows a total of 1,354,000 persons unemployed, which is 162,000 more than the previous week, and 191,250 over last year.

Monarch Is A Hero
Sofia.—King Boris played the role of hero recently when he jumped from a moving automobile and stopped a mob of runaway horses, probably saving the lives of several children.

Letting out cats on fire to destroy vermin in office and warehouse buildings, becoming a thriving industry in London.

Cabinet Ministers Sworn In

Hon. J. A. Robb Succeeds Fleming As
Minister of Finance

Ottawa.—The cabinet re-organization was officially completed when Hon. J. A. Robb was sworn in as minister of finance and Hon. Herbert Marshall, as minister without portfolio. The two ministers were sworn in by E. J. Lemieux, clerk of the privy council, in the presence of His Excellency Lord Dufferin at Government House.

Should the present government be returned to power, there is likely to be further re-adjustment of the cabinet.

Two ministers, Hon. Charles Murphy and Hon. Dr. Beland are, it is understood, retaining office only until the elections are over and there will then be some re-adjusting of portfolios.

Mr. Robb has been acting minister of finance for some time, owing to the illness of the veteran parliamentarian, Hon. H. W. S. Pringle, who now has been retired, after many years of service to his country.

Return Historic Shield

Escutcheon Taken From Quebec Is
Presented to City After Long
Sojourn in England

Quebec.—The city of Quebec celebrated the one hundred and sixty-sixth anniversary of the battle of the Plains of Abraham, and the subsequent capitulation of Quebec to the British troops were revived to the world when the escutcheon presented to the historic city by a knight of the Order of St. John, taken from the walls of Quebec by General Murray after the capitulation of the city, and afterwards handed to the city authorities for safekeeping, was officially returned to the city of Quebec as a goodwill offering from England to French Canada.

Hon. P. C. Larkin, Canadian high commissioner in London, handed over the shield to Quebec, the official representative of the town of Hastings, England, by the unveiling ceremony by Hon. N. Proulx, lieutenant-governor.

Canadians Coming Back

Over 50,000 Have Returned From U. S.
In One Year

Ottawa.—Immigration to Canada for the first three months of the present fiscal year, that is, from April 1 to June 30, 1925, totaled 22,444, according to a report issued by the department of immigration.

Of this total, 16,994 came from Great Britain, Northern Ireland and the United States, and 11,045 from other countries, almost entirely from Northern Europe.

In the same three months 9,141 Canadians who had been in the United States for six months or longer, and who went to that country to settle, returned to the Dominion.

Since the department of immigration and colonization began to keep record of their returning Canadians on April 1, 1924, a total of 25,516 have come back up to the end of last June.

Dease Lake Promise
Was Not Fulfilled

Disappointed Miners Start Trek Back
From Cassiar Field

Telegraph Creek, B.C.—The out-trail from the Cassiar is being trodden today by a host of disappointed prospectors whose hopes of quick wealth in the placer fields of Dease Lake have been dashed by the cruel reality of life in the inhospitable northland.

A few small strikes have been made, but there is little to show for all the excitement that was stirred up last winter by the announcement of the discovery of free gold in the ancient mining camp which was abandoned in the nineties with the dawn of the Klondike glory.

Canada-U.S. Drug Pact

League of Nations to Study Recent
Extradition Treaty

Geneva.—Governments represented in the League of Nations are to study the recent extradition treaty between Canada and the United States concerning offenders against the laws concerning opium and other dangerous drugs, with a view to the conclusion of similar treaties among them. A recommendation to this effect was approved by the league council on recommendation of its permanent opium commission.

Ku Klux Klan In Berlin
Berlin.—The Berlin police announce that they have uncovered a movement, headed by three United States citizens, and participated in by about 1,000 Germans, for the establishment of an order to be known as the "Knights of the Holy Cross," along the line of the Ku Klux Klan.

Veteran Newspaper Man Passes

W. L. Ballantyne, "editor of the Journal at Emerson, Man., died suddenly at his home in Emerson, Man., Monday, September 7, from a stroke of paralysis. Mr. Ballantyne was one of the veterans of Journalism in Manitoba. He had been publishing the Journal for over 30 years, and previous to that time had been foreman in the office of the weekly, visiting Winnipeg with the Western Canadian editors. Mr. Ballantyne spent the summer in the Old Country, visiting Winnipeg with the Western Canadian editors. Mr. Ballantyne was on the executive of the Western Press Association, was a prominent Freemason, and is survived by his wife, who formerly was Mrs. (Dr.) Henderson, pioneer of Winnipeg and Stonewall. There are no children.

APPOINT BOARD
FOR ADJUSTING
LABOR DISPUTES

Ottawa.—The establishment of a board of adjustment on the Canadian National Railways to deal with grievances or disputes not otherwise satisfactorily arising from the application of wages and working conditions schedules as affecting clerical, station, shop, stock, roundhouse, and similar classes of employees was made public by representatives of the employees. The new board of adjustment, No. 2, which has been functioning for a number of years in connection with grievances of conductors, engineers, firemen, trainmen, maintenance of way employees and others.

Under the agreement just signed by representatives of the railways and the employees, the new board will be composed of eight members, four from the railways management and four from the employees. The chairman and vice-chairman will hold office six months and will be selected alternately from the management and the employees. To the board will be brought all matters of dispute arising from the application, non-application or interpretation of the schedules, and which have failed in settlement between the offices of the railway and the representatives of the employees. Decisions of the board will be final and binding upon both parties.

Has Denounced Bolsheviks
Premier of Australia Takes Stand
Against Communists

Melbourne.—The disturbed conditions in Australia have caused Premier Bruce to take a definite stand against the Communists.

In a public address here the premier denounced the local exponent of Bolshevism, and asserted his intention to hesitate to appeal to the people for endorsement of his action. If necessary, he would seek a mandate for further action to insure peace and good government.

Warrants have been issued for four hundred Melbourne men for their part in the unofficial strike against the recently announced wage decrease.

Earth's Blowing Down

Washington.—The earth is slowing down, says a recent publication of the Smithsonian Institution. But there is little danger of a cessation of its rotary motion, for the rate of slowing down is only one thousandth of a second per century.

This means a loss of a minute in six months in the earth's rotation. It is estimated that in 100 years the earth will have slowed down so fast that a day was three hours and four minutes.

Seize Canadian Schooner

New London, Conn.—The Canadian schooner, *Harbor*, of Lunenburg, N.S., was seized in Narragansett Bay when it grounded while attempting to escape from a patrol boat.

ACTION ON B.C. GRAIN RATE CASE TO BE DEFERRED

Vancouver.—Decision on British Columbia's application for revision of the grain rate on grain consumed for use for domestic consumption will not be rendered prior to a general revision of freight rates, according to a letter received by the Vancouver board of trade from Hon. H. A. McKewen, chairman of the board of railway commissioners for Canada.

Mr. McKewen takes the position that the seasonal movement of export grain demanded early action, while the same element of urgency was not present in the case of domestic grain rates. The same applies to express rates, upon which the board has been asked for a judgment.

Victoria.—That the railway commission's recent order equalizing export grain rates will not be affected by the resolution of three members of the commission who did not take part in the judgment, was the opinion expressed by Premier Oliver after he had examined copies of the documents.

Cowboy-Earl Likes Ranching

Wyming Man Who Inherited Title
Will Remain in U. S.

Shenando, Wyo.—Olmsted Henry Wallop, aged 46, winning rancher, who was born in London, England, will retain his United States citizenship and legal residence in this country, and plans to continue living on his place, which is near Sheridan after he assumes the title.

The new card did not appear to regard his title in the British peerage as extraordinary, and his answer to queries about his departure for England to visit a colony of Englishmen near Sheridan. He liked it, and bought a ranch.

During the fall of 1925, Wallop went to Canada on a hunting expedition. From there he wandered to Wyoming to visit a colony of Englishmen near Sheridan. He liked it, and bought a ranch.

Plans For Super-Zeppelin

U. S. May Build One Twice As Large
as the Shenando

Akron, Ohio.—Plans for a gigantic super-zeppelin twice the size of the *Loi Angeles* or the *Hindenburg* are being drawn up here by the experts of the Goodyear-Zeppelin corporation.

Dr. Karl Arnstein and Capt. Ernst Lehmann, German zeppelin experts, who are now vice-presidents of the concern, are in charge of the plans. The proposed super-zeppelin has been christened in advance the GZ-1.

The experts look forward not only to building this paper-bird, but to a day when they will build yet larger ships.

They believe that the larger ship would weather the most severe storms. In fact, they feel that smaller ships also can ride the severest storms.

The proposed GZ-1 would hold 5,000,000 cubic feet of helium. The *Loi Angeles* holds 2,500,000 cubic feet, while the *Shenandoah* held 2,100,000.

Earl's Blowing Down

Washington.—The earth is slowing down, says a recent publication of the Smithsonian Institution. But there is little danger of a cessation of its rotary motion, for the rate of slowing down is only one thousandth of a second per century.

This means a loss of a minute in six months in the earth's rotation. It is estimated that in 100 years the earth will have slowed down so fast that a day was three hours and four minutes.

Seize Canadian Schooner

New London, Conn.—The Canadian schooner, *Harbor*, of Lunenburg, N.S., was seized in Narragansett Bay when it grounded while attempting to escape from a patrol boat.

Japan Fighting "Red" Propaganda

Country Fears Effect of Intercourse
With Soviet Russia

Tokyo.—The Japanese government is fighting a "red" propaganda in Japan is ever present among the heads of the government. The government is planning to introduce a bill at the next Diet session for the organization of a special police service to deal with the situation. It is said a yearly outlay of 1,000,000 yen will be asked for this purpose.

The government has not been amenable in adopting measures calculated to be effective in coping with outward developments that may follow the reopening of the country for intercourse with Soviet Russia. Of these measures the most important is, of course, the new police preservation law, which the Diet voted at its last session.

It has been found that channels for the introduction of "red" propaganda are rapidly increasing owing to the growing frequency with which the peoples of the two countries are exchanging visits for commercial, touring and other purposes and also because of the freedom with which new publications are being imported.

The home office regards it as imperative in consequence that a police service of special nature be perfected to deal with the problem of propagation of radical thought.

Canada Not Thinking Of Annexation

Has No Idea of Joining U. S. Says
Premier King

Toronto.—"Canadians are no more thinking of annexation with the United States than citizens of the United States are thinking of annexation to the British Empire," said Mr. Hon. Mackenzie King, premier of Canada, at the directors' luncheon at the International Day of the Canadian National Exhibition.

Mr. King added, much laughter, that the idea of annexation of Great Britain and the United States was one that he would prefer to see dropped before the joining of Canada to the United States was considered.

The prime minister said that so far as he was concerned he would oppose with all his might the idea of annexation of Canada and the United States.

Anthrax Prices Advance

Predicted Cost Will Further Increase
If Bacteria Continue to Advance

Washington.—Complaints that retailers are beginning to increase prices of anthrax vaccine are adding to a number of claims. Predictions are that the price will be still further increased if the anthrax continues, and that consumers here and in Canada will suffer.

Meanwhile, there are no signs that the administration plans to intervene in the strike, and the walkout will apparently stop on indefinitely.

Unity in Canada IS STRESSED AT QUEBEC MEETING

Quebec.—Unity on the part of all the provinces in the Dominion was the keynote of the address delivered by Hon. Mr. Proulx, lieutenant-governor of Quebec, to fraternal governors of Canada.

Among the speakers were Sir James A. M. Aikins, lieutenant-governor of Manitoba, Col. Hon. Harry Cockshutt, lieutenant-governor of Ontario, and Premier Taschereau of Quebec.

Hon. Harry Cockshutt said the drawing together of the different provinces of Canada is being done in Canada. Sir James Aikins said the unfortunate thing was that Canadians did not understand each other.

"When I think of Canada, of its splendid future," he said, "and when I call it the province of Quebec, I call it the anchor of stability upon a troubled sea, as Canada could not be Canada if it were not for Quebec."

Premier Taschereau, after welcoming the lieutenant-governors and explaining the hopes and ambitions of the French-Canadians, said:

"Our nation is unity in diversity, and nowhere in this Dominion will you find a better Canadian spirit and a more friendly and sympathetic feeling towards those who will live in Canada."

British Columbia's perpetual summer, western wheat, Ontario's iron ore, Quebec's timber, and the resources and the Maritime's sea and forest wealth, if united, are the foundations of our great future."

Wants Embargo Removed

Vancouver.—Requests for the lifting of an embargo on Japanese ships which has been enforced for the last five years, have been filed with the Japanese government by the Canadian consular officials here. Samples of the new crop are to be shipped to Japan as soon as possible, and if they are not received from the Japanese the resulting loss, the embargo will be lifted, it is expected.

Advances Bay Route

Regina.—That the Hudson's Bay Railway is feasible and that it is completely feasible, the conclusion is desirable is the opinion of C. C. Cooke, of this city, who has just returned from a trip to the bay by rail and water, and with a party of western business men. Much material and considerable water power is available for harbor facilities at the end of the line, by states.

Surrender to Spaniards

Lima.—Reports in the Daily Express from Tanager says the Toman tribe, one of the richest and most important in Moroco, surrendered unconditionally to Spanish soldiers when they landed at Alhucemas Bay.

CANADA'S WHEAT YIELD ESTIMATE 391,819,000 BUS.

Ottawa.—Canada's wheat yield of 391,819,000 bushels for 1925 is the preliminary estimate of the bureau of statistics recently issued. The yield last year was 350,000,000 bushels.

The average yields in bushels per acre for all Canada in 1925 are estimated as follows: Fall wheat 29.5, last year 28.8; spring wheat 17.4, last year 17.1; all wheat 17.8, compared with 17.9 bushels per acre last year.

The fall wheat estimate for this year is 23,677,000 bushels and spring wheat 368,142,000. The estimate for oats is 51,657,000 bushels, a comparison with 46,574,000 bushels in 1924. The rye crop for 1925 is estimated at 15,527,000 bushels, compared with 15,000,000 in 1924.

In the Atlantic provinces "the weather has been ideal and a bountiful harvest is assured."

In Quebec the prospect for grain crops is generally favorable.

In Ontario "splendid harvest weather has prevailed, threshing is well advanced and grain crops are yielding well above the average." The weather in Manitoba was also favorable for harvesting, and threshing will become general at the end of the month. Considerable damage has been caused by hail, and yields are somewhat reduced but the yields are still generally above those of the ten-year average.

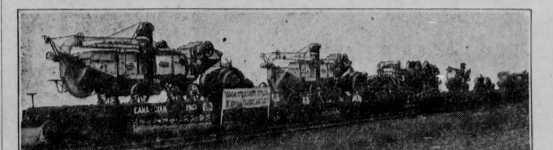

In British Columbia, showers during late August greatly benefited pastures and late crops.

In Alberta local weather has prevailed for harvesting, but heavy rains fell in the north. Prospects generally are for a good crop.

In British Columbia, showers during late August greatly benefited pastures and late crops.

Tractors and Threshers for the Harvest

Part of a recent shipment of tractors and threshers from the J. I. Case Threshing Machine Company, of Toronto, which left there recently over Canadian Pacific lines for the western wheat fields.

Part of a recent shipment of tractors and threshers from the J. I. Case Threshing Machine Company, of Toronto, which left there recently over Canadian Pacific lines for the western wheat fields.

[illegible]

Canada Must Hold Fast To Link That Welds Together Component Parts Of Empire

Several of some of the old ties of the British Empire is natural and reasonable progress, but few in Canada think on that account that the empire is disintegrating, said Mr. George Foster, in a public address at Victoria.

"Some people say it would not make any difference if the empire was a republic and headed by a president or a monarchy headed by a King," Mr. George added.

"But the British Empire, scattered as it is over the surface of the world and composed of races and tribes of all colors and beliefs, is held together by that common sovereignty of ours."

"It is symbol of sovereignty that has made the British Empire what it is, and we must hold fast to that link that welds into a whole all the scattered parts of the empire."

Protecting Caribou Herds

Indian Department Will Take Steps To Prevent Extirpation

Even as the buffalo, so may the mighty herds of caribou that roam the barren lands of Northern Saskatchewan be exterminated.

Today they are found literally in millions. Official reports have come from that country that the caribou, or elk, which state one of the great herds will take days to pass a given point in mass formation.

The caribou is gradually the king of the Indians in the territory where they wander. But it is feared the annual slaughter will have to be curtailed and the Indian department is now taking the necessary steps to that object in view.

The caribou is much less than one hundred in number, killed several thousands last year. It was obvious that no Indian was going to consume the caribou in a season and officials of a treaty party on a visit to Lac la Poudre last summer found the evidence of killing being carried beyond all reason. Those Indians are going to have to be taught to hunt that kind of slaughter will have to cease.

Market For Western Wheat

Norway Will Get Wheat In Canada Says Commissioner

Most of the wheat Norway requires this year will come from Canada, according to A. Johannessen, of the Norwegian food commission, Oslo, who is in Winnipeg, on his way through the west to study crop and marketing conditions here.

Many European millers and grain merchants suffered such heavy losses from February to May last year that they will be afraid to buy through contracts for next year, he said.

All the import trade of grain and flour to Norway is handled by the Norwegian government, Mr. Johannessen explained. It is a provisional measure, adopted during the war, and while the government can find no favorable agricultural conditions in the country. From 1914 to 1917, the government imported grain and flour. In 1917 the government took it over entirely.

Alfalfa Is Good Horse Feed

Experiments Show Profoundly Against It Is Unfounded

An experiment conducted by the Michigan Agricultural College seems to show that, to some extent at least, the prejudice against alfalfa as a horse feed is not founded on fact. Horses fed for a year maintained their weight and good condition, and did just as much work as less fed than their own team.

Nine teams of horses, varying from 2½ to 14 years of age, were selected for the experiment. One horse of each team was fed corn and alfalfa and the other corn, oats and timothy.

The alfalfa-fed horses consumed an average of 112 pounds of corn and 17½ of alfalfa per day, while the others ate 8 pounds of corn and 6.25 pounds of oats, with 13.6 pounds of timothy. It costs 21 cents a day for feed with the alfalfa-fed horses and 27 cents for the timothy-fed horses. The former gained an average of 21 pounds during the year, and their mates lost 17 pounds each.

The battle is the shallowest, only 45 yards in average depth. Next comes the Adriatic, with an average of 45 yards in depth.

Many a woman's chief aim is, at target called man.

W. N. U. 1391

Home Grown Seeds

Practice of Saving Seed Pods Will Prove Beneficial and Interesting

Collecting and drying one's own home-grown seeds is a fascinating game, especially if care is taken to select the best varieties of plants and mark them in some simple fashion. The money saved may then be used toward saving new seeds or plants. Even if the seedlings show the effects of lifting insects, they will carry the peculiar charm which belongs to the offspring from seeds developed in "your own home garden."

Select a dry day for collecting seed pods, and do not wait for these to burst before gathering. In some plants, ripening takes place all at once, while in others this operation extends over a month or more and only a few seeds can be gathered at one time. Probably the simplest method of drying is to place in a separate bag and label. Removing their cases may then be done when convenient. Exchange with friends and one of the most delightful ways of adding to one's store of plants and proving the quality of one's seeds.

Hungarians Buy Manitoba Farms

Former Colonel of Hussars Will Bring Family Out in Spring

Two Hungarian aristocrats will be settling in Manitoba soil next summer. Count Tass Palfy and Julius de Plosk, the latter a former colonel of Hungarian hussars, have purchased a section of land at Hinchey, 40 miles from Winnipeg. They will remain on the farm this winter until next spring, at which time the former colonel will return to his native land to get his family. They both state they want to learn farming by experience and will do the work themselves. It is said that Western Canada has to have quite a colony of little Hungarians was seen in the announcement by the Hungarian aristocrats, Winnipeg, that Baron Chervinsky, an officer of the hussars, had purchased a 1,000-acre ranch between Calgary and Banff.

Plenty Of Flowers In Canada

Many Cultivated In England That Grow Wild Here

Lady Blyne, who is an enthusiastic flower lover, wishes to transplant some Canadian flowers to her English garden and to that end sent her English gardener to make a botanical study of these wild things. Recently, at Jasper lodge, before a little audience invited to meet her, she spoke of the flowers which she had seen in the west. She commented on the number of flowers which she said were in England were only to be found in gardens, and there were frequently cultivated at considerable cost, but which she saw here in Canada growing wild and undisturbed, as people literally told her. She urged the members to cultivate rock gardens in Jasper. Her Excellency said it was astonishing how many people overseas thought that there were no flowers in Canada.

Cling For Exhale

The Exhale suffer from tonsillitis and adenoids. Dr. Curtis and Dr. Charles A. Pryor, Philadelphia, plan to establish a clinic for nasal treatment at Florence Court, Labrador.

Dominions Need Population

Rapid Progress Depends On Strong Immigration Policy

Continued and rapid progress in the Dominions depends upon the continued and rapid increase of their population. This is the opinion of the London Morning Post. Such increase can only be accomplished by means of inter-imperial migration. "There are in the world many more persons than the industries of the country can support. But before any large scheme of emigration can be carried into execution, it is necessary to ensure that new settlers in the Dominions shall be provided with a market for their produce. Great Britain is the best market in the world; and by means of a policy of preference, the products of the Dominions may be given the advantage over foreign products. But, again, the possibility of emigration on a great scale depends upon the working together of the Dominions with this country. How essential it is to their populations with English stock the Dominions have not yet thoroughly understood. It appeared in the course of the parliamentary debate that, by reason of delay overseas, some 25,000 persons, approved by the authorities, are waiting to migrate."

British Boys For Alberta

Contingent of Boys For Training at Alberta Government Farm School

Arrangements are now being made for bringing over this year's contingent of British farm boys for training at the Alberta Government farm school. A small white man, now sent after the sargun had removed three growths from his eye.

Miss Steinacker claims that a real boy for life is a necessary basis for all successful training and care of them. She operates on little canines to remove tumors, mounds broken wings and wings, prescribes special diets for upset digestions and intestinal disorders and trains birds in good habits, such as daily baths and business with their seed.

Adjustable Water Wheel

Will Rise and Fall Any Height Up to 36 Feet

A water wheel has been invented which is designed to adjust itself automatically to the varying height of the propelling stream. As first constructed the wheel has eight V-shaped paddles about 12 feet long and 12 inches wide, and it is so mounted on an upright tank that it rises and falls with the river's changes through its height up to 36 feet. It is used for pumping irrigating water from a ditch into a 230 feet to a height of 70 feet above the source. Pumps and machinery are placed on the river bank, and the wheel and tank are connected by a shaft having universal couplings at each end.

Pind Statue In Ocean

A well preserved statue of antiquity was found in the sea off the coast of Marathon by a number of fishermen. The statue is of bronze and represents the life-sized cast of a youth. Greek experts declare that the statue is extremely valuable and will compare it to the famous statue of "The Youth of Antioch."

Increased Taxation Must Necessarily Follow Demand For Better Public Service

New Profession For Women

Bird Hospital In New York Does Flourishing Business

Miss Estelle Steinacker, niece of the late Dr. J. J. Hanna, one of the founders of the French Hospital in New York, and for many years chief surgeon there, has the unique profession of bird surgeon. Receiving her surgical training from her uncle, Miss Steinacker applied her skill to feathered pets and has restored hundreds of sick birds to health during the past twenty-three years. She was the only visiting physician on the staff of the late Miss Virginia Pope, well known bird doctor, who maintained a home for birds in New York for many years.

At Miss Steinacker's hospital and boarding house for feathered pets a relation to his previous efforts. A trooper is recovering the use of a badly maimed leg that Miss Steinacker saved. A small white man, now sent after the sargun had removed three growths from his eye.

Miss Steinacker claims that a real boy for life is a necessary basis for all successful training and care of them. She operates on little canines to remove tumors, mounds broken wings and wings, prescribes special diets for upset digestions and intestinal disorders and trains birds in good habits, such as daily baths and business with their seed.

Ignorant Of Canada

Premier Ferguson Tells English Journalists He Was Amazed

The married farmer with sufficient money to establish himself had the boy from the middle classes who can be trained into a farmer as the kind of immigrants Ontario must desire. Premier G. H. Ferguson told a party of ten English journalists who were in Toronto in the course of a tour of the Dominion.

Mr. Ferguson told the journalists that when he was in England the thing that amazed him was the want of knowledge of Canada and conditions in the Dominion. He found that people knew far more about Australia and New Zealand than they did of this country. We need men over there who will understand conditions in Canada.

Revising The Ancient

Flowers that blossomed in ancient Egypt 2500 centuries before Cleopatra, and wheat and barley, taken into the royal tombs to sustain Pharaohs and their post-mortem travels, have been brought to Chicago by Prof. James Henry Breasted, noted Egyptologist of the Chicago University.

Flowers is scattered from the tracks of the Nile, Egypt, and a few other plants, as well as from the plant.

Settlers From United States

Many American Farmers Taking Up Land In Western Canada

Returned from what he regards as a remarkably encouraging inspection of the various agencies in the west, western, northwestern and southwestern states, A. Bruce Walker, superintendent of immigration in the United States, states that from April 1 to August 31, of this year the number of farmers sent up from these states to settle land in Western Canada shows an increase of 50 per cent. over the same period last year, and from the same region last year.

He stated, too, that from March 1 to August 31, this year the "Canadian National Railway and the Hudson's Bay Company sold more land in Western Canada than in a similar period for the past ten years."

"All we have to do," said Mr. Walker, "is to get those Western American farmers to go and see Canada; Canada will do the rest. If Canada with her wonderful wild fields can induce them to come to the states, they will be glad to go. They are going to Canada in steadily increasing numbers to see the country and steadily increasing numbers of these people are taking and staying. Reports from agencies of the department wherever located in the United States tell the same story."

Borrowed Fashion

Indian girls on the Glacier National Park reservation bob their hair just like the pale face city misses. They use rouge, too, of a hue that blends with their copper colored complexion. And the wrinkled old squaws make it for them from herbs which they gather on the wooded slopes of the Rocky Mountains. Out in the west these Indians take it for granted that the pale face girls got the idea of bobbing from the American Indian custom, just as the Indian girls took the hair bobbing habit from their "white sisters."

Time For Best Work

Tests performed on 112 students at Chicago University by Dr. Donald Laird, indicate that the average mind does its best work at 8 a.m. and the poorest work at 4 p.m. Wednesday is the best day of the week and Saturday the poorest.

First Census Taken

Until two years ago no census of the population of Palestine had been taken since the time of Solomon. In 1921 there were 83,794 Jews in the country; today the total is estimated at 105,000.

Worse—"Did the speaker electricity his audience?"

"Worse, buddy, he gassed it."

AD. AND CIRCULATION MEN AT JASPER PARK

Advertising and circulation men, representing all the important daily newspapers of Western Canada, together with representatives of advertising agencies and publishers' representatives from the Atlantic to the Pacific coast, again held their annual convention at Jasper Park Lodge and were snapped by the Canadian National Railway photographer, Jerry City. In the west, Jasper, Winnipeg, and Vancouver, B.C., is represented in the group, while agencies from Chicago, Montreal, Toronto, Winnipeg and other cities also had representation. At the close of the convention on August 17, the two executives expressed the delight with the beauties of Jasper National Park and their appreciation of the care shown them by the lodge management.

WORLD HAPPENINGS
BRIEFLY TOLD

Since 1918, two billion dollars in overpaid income tax and delinquent penalties have been collected in the United States.

The chimes of "Big Ben" in the Parliament Building at London, were heard plainly in San Francisco over special telegraph and cable circuits.

Sir Francis Lewis Castle Flood, London, permanent secretary of agriculture and fisheries since 1920, has been appointed a member of the overseas settlement commission.

The aeroplane service of the European Union, comprising 16 aerial navigation companies, is to be continued during the winter this year for the first time.

Mrs. Isabella Forke, mother of Robert Forke, leader of the Progressive party in the House of Commons, died at the latter's home in Pipetown recently, aged 91 years.

Provision that one-third of his million dollar estate be used for the relief of school teachers, was a feature of the will of the late Simon Gray, Philadelphia.

Field-Marshal Baron Plumer, new British high commissioner for Palestine, has arrived at Jerusalem and taken the oath under the commission of Palestine.

Professor Batista Gracia, the famous bacteriologist and physician, died recently at the age of 70. He was widely known in the international medical world as an investigator of malarial disease.

The London Daily Mail says the British Government has ordered the arrest of all Communists concerned in plots which have been brought to light during the past few weeks in India, once troops at the Aldershot camp and elsewhere.

The "newsboy plane" is the latest aerial stunt. A Stinson biplane, the paper titled delivery of papers by dropping them at the farmers' doors from an aeroplane, and three-lights of the farmers reported safe arrival of their papers.

Will Live On Beans

Solving the Food Problem For Russia's Population

A newly discovered foodstuff, which may solve Russia's food problem and enable the government to approach a solution of the food problem for millions of her population is being offered officially in Moscow. The new food is the product of a Budapest physiologist, Dr. Ladislav Hercz, who, who is continuing his work on government regarding the production and distribution of Soyabean flour, a foodstuff which is said to possess great nutriment. Fifteen twenty-four mills are in operation, but so far un-equipped with the proper machinery to provide food for two million persons. In nutriment value two pounds of Soyabean flour equals two pounds of meat, plus a half pound of wheat flour and its nutrient value is as great as meat and egg substitute. It is estimated that the introduction of Soyabean flour on the scale now contemplated will enable the Soviet Government to release 400 tons of meat and eggs daily for export.

Uncomfortable Antiques

Old Furniture Not As Comfortable As Modern Kind

While very high prices are paid for antique furniture we know that such furniture is not always the most comfortable in which to reside. When Queen Alexandra was visiting York many years ago as Princess of Wales she stayed at the treasurer's house, and dining no night in the library as the guest of Dean Percy Cost, she dropped in a lounge chair and remarked: "How glad I am to drop into comfortable chair, after too much William and Mary." Our ancestors carried themselves well, but it must have been at the cost of many a sleepless night in straight-backed chairs.

The Traders In Dope

The prohibition of the traffic in drugs had the hearty support of all Canadians except the comparatively few who would believe that are addicted. There is in this no lessening of the danger. The man or woman who trades on the weaknesses of those afflicted with the drug habit has sympathizers—it is one of the most despicable crimes. The splendid work, therefore, of the Royal Canadian Mounted Police in searching out these parasites will have general commendation. —The Ottawa Journal.

When everybody says it, nobody knows it for certain.

Intervention in here is equivalent to a declaration of war.

W. N. U. 1924

Disease Among Eskimo

Adopting White Man's Methods May Lead to Extinction

Not many years will elapse before the Eskimo will be exterminated by disease through adopting white man's method of habitation, declared Dr. D. E. Scott, who recently returned to Edmonton after spending one year at Akavik, in the delta of the Mackenzie River. He has been acting as medical officer to the Royal Canadian Mounted Police Arctic posts and working among Indians and Eskimos, in behalf of the department of Indian affairs. While this prediction has been made by others in the past, Dr. Scott adds that Eskimos and Indians of the delta are also suffering from intestinal parasite attacks, due to eating raw fish, rabbits and other meats. This, however, he claims, is not a serious problem to contend with, but such disease as cancer and appendicitis, he states, are becoming too prevalent among the Indians.

In the old days, when snow houses were their temporary homes, the Eskimo were healthy, states the doctor, but since they commenced living in cabins and shacks, tuberculosis has broken out among them, and this dread menace threatens to wipe them out. Among the delta Indians, Dr. Scott found that in all but ten per cent, there were symptoms of tuberculosis. Their methods of living were such that the disease was on the increase.

Speaking of law and order in the delta, Dr. Scott declared that the Eskimos and Indians of the Western Arctic regions are the most law-abiding people in the world, and he would not recollect one single case during the year he was among them in the eastern regions, however, where misanthropes have not penetrated, but since the doctor says, is really the Eskimo own law at work.

How Russia Goes After Business

Fomenting Strikes in England in Order to Sell Their Own Goods

The Paris correspondent of the New York Times reveals that at the very time the ruling spirits of Bolshevism are waging on the British Isles, our men in their strike threat, Moscow's agents were canvassing Europe for orders for Russian coal, to replace English and Welsh coal during the expected shortage. That is the kind of friends for the British Government, who are to be banished. All the Russians who had brains and training enough to manage an industry successfully, and to market products successfully, the Bolsheviki find that their mines and factories cannot compete with the "capitalistic" industries of other nations. What is simpler than to get everybody else to go on strike so that Russia will have a chance to sell something?—Minneapolis Journal.

Ontario Makes Drastic Laws For Motorists

Must Obtain Driving Permits and May Have to Pass Examination

Every man and woman who drives a motor car in Ontario next year will first have to obtain a driving permit. Hon. G. R. Hertz, minister of public works and highways, told the national meeting of the Canadian Automobile Association at Toronto. The issuance of these permits would, in all probability, be followed by compulsory examination for all drivers, he said. Any conviction for traffic act infractions registered against a motorist would be entered upon his permit and could lead to the permanent revocation of license to drive.

May Abandon Dirigibles

U. S. Government Virtually Decides to Concentrate on Aeroplanes

The Shenandoah disaster probably will result in the temporary, or complete abandonment by the government of its lighter than air activities. The Los Angeles may be sold for what it will bring, the Langley air station probably closed, helium extraction will be curtailed and from now on appropriations and energies will be concentrated on aeroplanes. The programme had virtually been decided for reasons of economy, before the loss of the Shenandoah, and with this new proof of the vulnerability of dirigibles seems more certain than ever to be adopted.

The Age of Speed

The cities and towns of Rhode Island have set 35 miles an hour as the proper speed for autos on highways. They contended that having spent vast sums on roads they cannot afford to have them cluttered with cars moving along at only 15 or 16 miles.

Children in Glasgow may travel any distance on the street railway for one penny. Some of the routes extend up twenty-five miles.

CLIPSE FASHIONS

Charming Envelope Chemise

When it comes to undergarments you can be just as frivolous as you please. Just a few running stitches a bit of hand-embroidery and some shiny lace and ribbon, and you have a choice bit of underwear of your very own making. The diagram pictures the simplicity of the step-in chemise which may be scaled-in at the lower edge or left plain. The sides of both the front and back are cut in the bias and slightly gathered at the upper part, insuring a perfect fit. Each copy includes one coupon good for five cents in the purchase of any pattern.

Find Graves Of Massacred Christians

Believed To Be Victims Of Jap Revolution In 1937

Dr. Earl R. Dail Methodist Episcopal missionary in charge of work in Los Chos Islands, Japan, has discovered the burial ground of 11,000 Christians, believed to have been killed in an uprising during the revolution of 1937. An inscription found near the grounds by Dr. Dail states that in all 12,500 Christians were slain, beheaded and buried. The heads of the victims were buried in one spot and the bodies carried to another place, so there would be no chance of them being found, the inscription said. The massacre practically wiped out all the Catholic converts in the country.

Open Big Conference

Seven Hundred Delegates Attend Child Welfare Conference at Geneva

An immense effort to improve the welfare of the world's children was launched at Geneva with the opening of the first world welfare congress, attended by 700 delegates from 56 nations, including the United States and many of the Latin-American Republics. Two hundred delegates, dealing with various aspects of the child problem were submitted to the congress. Andre Oulman, Swiss minister of education, of the world's children to the congress, and the Marchioness of Aberdeen was chosen to head the education section.

In Long Buried City Of Ur

The cities and towns of Rhode Island have set 35 miles an hour as the proper speed for autos on highways. They contended that having spent vast sums on roads they cannot afford to have them cluttered with cars moving along at only 15 or 16 miles.

A British ship building firm predicts that motorships "will replace steamships. It is building 13 large vessels which will be operated by gasoline motors.

Poor Remuneration For Technical Work

Very Discouraging For Those Who Go In For Professions

A New York newspaper is making an appeal for the better treatment of that city's engineering staff. It is an extraordinary sidelight on the broad and bitter value of a technical education when college graduates must appeal for compensation almost as generous as that of plumbers, bricklayers and plasterers.

Of the engineers employed by the city of New York, and the same scale presumably is common throughout the continent, ten per cent, receive less than ditch diggers. About twelve per cent, earn as much as foremen of street labor crews, while the majority are not so well paid as the everyday mechanical craftsmen.

It is a peculiar fact that the so-called "white collar" employment, including bank clerks, bookkeepers, draughtsmen employed by architects, engineers who lay out the work for their better paid ditch diggers, and mining engineers, are all in comparison to the trades and to unskilled labor shockingly underpaid.

If there is not a racial turn for the better in these matters the next generation will be short of engineers. Of college men seeking technical education. If a young man can choose a decent living at his own profession after spending a year of money and four or five years of his life in a university, he is loath to pursue it.—The Toronto Saturday Night.

China's Substitute For War

Boycott Has Become Favorite Weapon Against Other Nations

The Chinese are adept in the use of the boycott. It is their chief weapon for the time being. In South China Canadian goods are included in the boycott declared against imports from Europe. British will be discarded by merchants and manufacturers in the Dominion who have dealings with the United States.

The case is in which Canada is penalized through no fault of her own because she dies the Union Jack. It must be met against the many others in which Canadian goods are marked as "made in Canada" and because it is a member of British Commonwealth of Nations.—Toronto Globe.

Receive Fewer Immigrants

U. S. Immigration Reduced By 68 Per Cent. Due to New Laws

The number of immigrants has reduced by approximately 68 per cent, the influx of foreigners to the United States, according to analysis of immigration statistics for 1924-25. Many nationals of foreign countries are leaving the United States for their home countries. Several countries have not failed to fill their quotas, but the net immigration has been reduced by an emigration of aliens. Figures show that 29,241 more Italians left the United States than entered it during the year.

Turks Abandoning Old Customs

Officials Must Wear Hats and Dress Like Europeans

More and more the newly-born Turkish Republic is abandoning old Turkish customs and substituting European methods, while the fez and turban at national headgear seem to be going into the discard. The council of commissaires has decreed that all officials must dress in European fashion and wear hats. Only priests are to be permitted to wear turbans and they must consult with government officials.

Crippled Veterans Work For Princess

Have Nearly Completed Bedroom Suite Ordered By Lord Lasswell

A porter, waiter, market gardener and farm laborer are helping to make one of the most beautiful pieces of furniture produced during the generation—a room acquired bedroom suite of a Hindustani maharajah ordered by Lord Lasswell for Princess Mary Viscountess Lascelles.

A London Daily Mail reporter saw the master's suite growing in the hands of the disabled workers of the Lord Roberts Memorial Workshops, Fulham Road, S.W., not one of whom had any knowledge before the war, in which he was wounded, of the trade he is now practicing.

James A. Macdonald, 47, veteran newspaperman and formerly news editor of the Saskatoon Star, Saskatoon, Ontario, Regina Post and Herald, and at one time was an employee of the Northern Crown Lumber. An accident of his brain was the cause of death. He married in 1914 and has a widow and six children. The funeral was held at Little Rock, Ark.

Discover Huge Jewel

Cache In Leningrad

Hidden In House Of Former Tailor To Gar

In a house formerly occupied by the tailor to the Czar, whose name is Lidal, and who now carries on a banking business in Paris, an immense quantity of gold and silver articles, such as precious stones and diamonds, have been discovered. One Jew has found in the house 17 small articles of elaborate workmanship and a number of the finest blue diamonds weighing 25 carats. The find also included a great number of gold and silver cigarette cases, snuff boxes, rings and tiepins.

Demand For Domestic

Saskatchewan Farmers' Wives Are In Need of Household Help

Saskatchewan farmers' wives are looking anxiously for the household help which is so much needed in the industry of the Provincial Government arranged to be sent to them from the British Isles under the Imperial Government overseas settlement scheme. The bureau contracted for 100 domestic to be sent to Saskatchewan during the year-end barely half have arrived. Most of the demand is from farm women.

Some men are so unucky that if an earthquake should break it out they wouldn't swallow the land until it would after they had paid the taxes on it.

BARRE, SON OF KAZAN

James Oliver Curwood

A LOVE EPIC OF THE FAR NORTH

Copyright, 1917, by Doubleday, Page & Co.

"BARRE, SON OF KAZAN," by James Oliver Curwood, with Wolf, the War Dog.
Is an Adaptation of This Story

SYNOPSIS

Barre, wandering in the woods, rambles. Wakayoo, the black bear, and fastidious, watched him from the edge of the pool. He learned where Wakayoo carried his provisions, a discovery that solved the food problem for the young wolf-dog. One day he suddenly found himself face to face with Pierrrot, the trapper, and his daughter, Nepeese. The Willow, who had been before him and slightly wounded Barre, thinking him a wolf. Nepeese now rescued Barre, who concealed himself behind a great boulder.

CHAPTER VII.—Continued.

From where he lay Barre could not "what happened. Scarcely had he crawled under the rock when Nepeese and Pierrrot appeared through the break in the dip, and stopped. The fact that they stopped startled Barre. They were afraid of Wakayoo. "The big bear" was two-thirds of the way across the meadow. The sun fell on him, so that his coat shone like black satin. Pierrrot stared at him for a moment. Pierrrot did not kill for the love of killing. Nepeese made him conversational. But he saw that in spite of the lateness of the season, Wakayoo's coat was splendid—and he raised his rifle.

Barre saw this action. He saw, a moment later, something spit from the end of the gun, and then he heard that Nepeese cried that had come with his own burr, when the Willow's bullet had burned through his flesh. He turned his eyes swiftly to Wakayoo. The big bear had stumbled; he was on his knees; and there he struggled up and lumbered on.

The roar of the rifle came again, and a second time Wakayoo went down. Pierrrot could not miss at that distance. Wakayoo made a splendid mark. It was slung; yet for that Pierrrot and Nepeese it was business—the business of life.

Barre was shivering. It was more from excitement than fear, for he had lost his own fear in the tragedy of these moments. A low growl rose in his throat as he looked at Wakayoo, who had risen again and faced his enemies—his jaws gaping, his head swinging slowly, his legs weakling under him as the blood poured from his torn lungs. Barre whined—because Wakayoo had fished for him, because he had come to look on him as a friend, and because he knew it was

death that Wakayoo was facing now. There was a third shot—the last. Wakayoo sank down in his tracks. His big head dropped between his forepaws. A racking cough or two came to Barre. And then there was silence.

CHAPTER VIII.

As Nepeese gazed about the rock-rimmed end of the canyon, the prison into which they had driven Wakayoo and Barre, Pierrrot looked up again from his skimming of the big black bear, and he uttered something that no one but himself could have heard. "Now, it is not possible," he had said a moment before; but to Nepeese it was possible—he thought that was in her mind. It was a wonderful thought. It thrilled her to the depth of her wild, beautiful soul. It sent a shiver to her eyes and a deeper flush of excitement into her cheeks and lips.

"She drew herself out and stood once more in the sunshine."

As she gazed the ragged edges of the little meadow for signs of the dog, her thoughts flashed back swiftly. Two years ago, she had buried her princess mother under the tall spruce near their cabin. That day Pierrrot's sun had set for all time, and her own life was filled with a vast loneliness.

There had been three at the graveside that afternoon as the sun went down: Pierrrot, herself and a dog, a great, powerful husky with a white star on his breast and a white-tipped ear. He had been her dead mother's pet from puppyhood—her bodyguard, with her always, even when he lay resting on the side of her bed as she died. And that night, the night of the day they buried her, the dog had disappeared. He had gone as quietly and as completely as her spirit. No one ever saw him after that. It was strange, and to Pierrrot it was a miracle. Deep in his heart he was filled with the heavenly conviction that the dog had gone with his beloved Wyoko into heaven.

But Nepeese had spent three winters at the Missioner's school at Nelson House. She had learned a great deal about white people and the real look, and she knew that Pierrrot's thought was impossible. She believed that her mother's husky either died or had joined the wolves. Probably he had gone to the snows. It was it not possible that this younger sister and her father had pursued with it of the flesh and blood of her mother's pet? It was more than possible.

Barre had not moved an inch from under his rock. He lay like a thing stunned, his eyes fixed steadily on the scene of the tragedy out in the meadow.

Barre wanted to approach. It was like an invisible string tugging at his very heart. It was Kanan, and not Gray Wolf, calling to him back through the centuries, a "call" that was as old as the Egyptian pyramids and perhaps ten thousand years older.

But against that desire Gray Wolf was

pulling from out the black ages of the forests. The wolf held him quiet and motionless. Nepeese was looking about her. She was smiling. For a moment her face was turned toward him, and he saw the white silver of her teeth, and her beautiful eyes seemed glowing straight at him.

And then, suddenly, she dropped on her knees and poured under the rock. Their eyes met. For at least half a minute there was not a sound. Nepeese did not move, and her breath came so softly that Barre could not hear it.

Then she said, almost in a whisper: "Barre! Barre! Up! Barre!"

It was the first time Barre had heard his name, and there was something so soft and coaxing in the sound of it that in spite of himself the dog in him responded to it in a whimper that reached the Willow's ears. Slowly she stretched in an arm. It was bare and round and soft. He might have darted forward the length of his body and buried his fangs in it easily. But something held him back. He knew that it was not an enemy; he knew that the dark eyes shining at him so tenderly were not filled with the desire to harm—and the voice that came to him softly was like a strange and thrilling music.

"Barre! Barre! Up! Barre!" Over and over again the Willow called to him like that, while on her face she tried to draw herself a few inches farther under the rock. She could not reach him. There was still a bar between her hand and him, and she could not wedge herself in an inch more. And then she saw where on the other side of the rock there was a hollow, about a foot long. It she had removed the stone, and come in that way—

She drew herself out and stood once more in the sunshine. Her heart thrilled. Pierrrot was busy over her bear—and she would not call him. She made an effort to rise, the steady climb down the hole under the big boulder, but it was wedged tightly. Then she began digging with

five minutes—and Nepeese could move the stone. She tugged at it with her teeth, she dragged it, out until at last it lay at her feet and the opening was ready for her body. She looked again toward Pierrrot. He was still busy, and she laughed softly and she untied a big red-and-white bag handkerchief from about her shoulders. With this she would secure Barre.

She dropped on her hands and knees and then, lowered herself slowly on the ground and began crawling into the hollow under the boulder. Barre had moved. With the back of his head flattened against the rock he heard something which Nepeese had not heard; he had felt a slow and growing pressure, and from this pressure he knew that there was a dog, and the pressure still followed. The mass of rock was settling! Nepeese did not see or hear or understand; she was calling to him more and more pleadingly:

"Barre—Barre—Barre—" Her hand and shoulder and both arms were under the rock now. The glow of her eyes was very close to Barre. "Ah, white!"

There was a loud crash, the stir of his blood. And then—

(To be continued.)

The Oldest Living Thing

Be Found in Solid Rock Is Shown At Toronto

J. E. Wilson, Toronto biologist, is exhibiting a bee, nesting in a solid block of blue stone, which he received recently from a quarry near Owen Sound. When the block of stone was split, says Mr. Wilson, it was found to contain a cavity in which was a rounded, with a bee partly buried in its dried petals. After being dislodged the bee was able to crawl. Accepting the story as fact, the bee in question is undoubtedly the oldest living creature, anything from 25,000 to millions of years old.

Mother Grouse Worm Extirminator will drive worms from the system without injury to the bird, because of action, which is fully effective, is mild.

"Jesse, I have told you again and again not to speak when other persons are talking, but wait until they stop." "I've tried, but I can't, mamma. They never do stop."

DODD'S KIDNEY PILLS
"I have tried to keep my kidneys in good shape, but I have failed. I have used many different remedies, but I have not found any that will cure me. I have heard of Dodd's Kidney Pills, and I have decided to try them. I have taken them for a few days, and I feel much better. I have no more pain in my back, and I feel much stronger. I have decided to keep taking them, and I hope to be cured soon."—Mrs. A. A. Adams, Box 24, Forest, Alberta.

Pains in Left Side
Lachine, Quebec.—"I took Lydia E. Pinkham's Vegetable Compound because I suffered with pains in my left side and back and with weakness and other troubles worse than before. I was this way about six months. I saw the advertisement of the Vegetable Compound in the Montreal Standard, and I was helped a little with the charges. I recommend the medicine to my friends and am willing for you to use this testimonial letter. Mrs. A. A. Adams, Box 24, Forest, Alberta."

Historic Old Firm Fails

Blacking Manufacturers in England Flourished until They Gave Up Advertising

Immortalized by Charles Dickens in "Pickwick," the old-established firm of Day and Martin is to close. It was the blacking manufactured by the firm which had been the boots of his master.

An extraordinary general meeting of shareholders passed a resolution that the concern should "voluntarily" wind up. It was stated that the company had been able to pay off all its old liabilities and to leave a little in hand. Beneath this announcement lies the romantic history of trade, for the firm of Day and Martin is known throughout the English-speaking world. It is mentioned by Dickens and Tom Hood, by George Elliot and Carlyle.

The firm was founded, in 1770, more or less by accident. Mr. Martin, of Doncaster, who was a hairdresser and a surgeon-barber, bequeathed a weary soldier who had fought his last battle in order to show his gratitude, the soldier gave him a secret recipe for blacking, which he had constantly used on officers' boots. "Make blacking like that," he remarked, "and you will make a fortune." Mr. Martin, in his own mind, decided to try the recipe. They did so, and so began the famous firm. Up to 1854, the firm prospered greatly. It then fell on evil days, largely through the unwillingness of the directors to advertise.

SUMMER COMPLAINTS KILL LITTLE ONES

At the first signs of illness during the hot weather give the little ones Baby's Own Tablets or in a few hours they will have summer complaints if given nothing. Baby's Own Tablets will promptly relieve these troubles if given on the first signs of trouble. Baby's Own Tablets should always be kept in every home where there are young children. There is no other medicine so good and the mother has the guarantee of a safe remedy that there are any. Baby's Own Tablets are sold by all druggists and by mail order.

Old-fashioned ideas may be the best at times, but you can't run an auto by feeding it oats.

TEETHING BABIES DIE EVERY SUMMER

The hot weather is very hard on babies starting to cut their teeth. One of the signs of early bowels of the bowels the mother should give a few doses of

D'FOWLER'S EXT-O-WILD STRAWBERRY
This will quickly effect the diarrhea, vomiting, flatulence, and, perhaps save the baby's life.
Put up only by The T. Millburn Co., Limited, Toronto, Ont.

Paper From Flax Straw

Alberts Experiments to Establish a New Industry to Benefit Farmers

It is understood that paper from flax straw is a new Alberta industry. Making some progress towards realization and the Provincial Government is continuing its investigation into the business possibilities of such an enterprise. Sufficient experimentation has already been done for the present, but further details in connection with getting a possible industry under way will be gathered from the government by the trade commissioner.

Plain English
"Many told me she stayed under water for two minutes one day last summer."
"Really! It sounds as if he were amphibious."
"Well, that's the Greek for him, you've hit it!"

Minard's Liniment for Discomfort

Ceremonies Observed At Sea

Ships Go Through Certain Ceremonies When Passing Each Other

Ships at sea have a "language" of their own when they talk to converse with or signal to one another. Nearly all big steamers carry wireless installation, but in addition, every vessel of this type is provided with a mechanical whistle or siren, a mechanical horn and a bell. Sailing ships are obliged to have both a mechanical foghorn and a bell before they are allowed to enter or leave a port. When ships pass one another at sea certain ceremonies are observed. Thus, a merchant vessel meeting a warship is expected to dip her flag in salute, a courteous acknowledgment of the flag-carrying power. It is in a similar manner. Cruisers are generally saluted by "trumps" while when one liner meets another the junior captain dips his house flag first.

COLOR IT NEW WITH "DIAMOND DYES"

Just Dip to Tint or Boil to Dye

Each 10-cent package contains directions on simple way to color.

Each 10-cent package contains delicate shades of dye rich, permanent colors. It is used on silks, ribbons, skirts, waists, dresses, coats, stockings, sweaters, draperies, coverings, hangings—everything!

Use Diamond Dyes—no other kind—and tell your druggist whether the material you wish to color is wool or silk, or whether it is linen, cotton or mixed goods.

One Explanation

"Too many motorists nowadays can spell go, but can't spell stop," a Detroit judge says. Which may be a result of having eight cylinders in the engine and only four wheels with brakes on—Kansas City Star.

The Oil of the People—Many oils have come and gone, but Dr. Thomas' Eucalypti Oil continues to maintain its position and increase its sphere of usefulness each year. Its sterling qualities have brought it to the front and kept it there, and it can truly be called the oil of the people. Thousands have benefited by it and would use no other preparation.

Tenacity of the British

Ability To Hang On Is Secret Of Empire's Success

For the British the empire and its ways are not for eternity. Days and years are nothing. They just keep on going and although they ask themselves occasionally when Ramsey MacDonald gives up Singapore, or the coal miners go into industry, or the docks close, or a squadron loses, or nearly, lose a naval battle, whether the empire is to survive, down deep in their hearts they know that it is not worth asking and does not deserve an answer. They may have to hang on a long time to an enemy who knows they are strong and get mad because they don't know it. All they know is that time is long and all that's necessary is to keep it at. Not so good today, but tomorrow is another day.—Chicago Tribune.

Minard's Liniment used by physicians

May Queen Opens Bridge
May Queen Kathleen cut the ribbon at the recent official opening of the new bridge over the South Thompson River at Kamloops, B.C., which cost \$225,000. A bevy of pretty girls representing Canada and her provinces welcomed took a prominent part in the ceremony.

1 lb Package
KRAFT'S K-CHEESE
A handy size package for occasions when half a pound is "just right."

The Importance Of Faith

Doctors Like Patients Who Believe They Will Recover

A Swiss watchmaker who died recently at the age of 100 was diagnosed by physicians in his youth as incurably tubercular. He studied his own case, adopted a systematic, reasoned plan of living and continued in the enjoyment of an active life far beyond the usual span. He had the will to live, call it by whatever name you wish.

Nurses, and physicians, know how important is the patient's state of mind. A will to live, a strong desire to get well, often is the determining factor in a recovery. A cheerful, buoyant mind is one of the best of a good physician's attributes.—The Buffalo Express.

"Well, what's troubling you?" Patient—"Frequent pains in the back."

Doc—"Here are some pills; take one fifteen minutes before meals."

MURINE
Keeps EYES Clear, Bright and Beautiful
Use Murine Co. Chicago, for the Cause

"My dear, the doctor says a brick ball before going to bed will cure my insomnia."

"Well," returned his wife, "I'll clear the room so you can walk, and you may as well take the baby with you."

Take your own mustard Pickles
Home-made mustard pickles. How delicious — and how easy to put up. Here's the recipe:—

MUSTARD PICKLES
1 qt. small onions 1 large cauliflower 10 cucumbers 2 large jars
Add peppers
Peel onions and cauliflower in small strips, wash with weak brine and let stand in water for 24 hours, then bring to a boil and drain off.

Put 2 cups brown sugar, 1 cup brown 5 cents and 1/2 pint of vinegar in a mustard. 1 tablespoonful turning and 1 quart vinegar. Boil this mixture for twenty minutes, stirring occasionally. Pour over vegetables hot. Let stand ten days, stirring every day, then bottle.

"BUY WHERE THE BUYING IS GOOD"

Oyen Trading Company

— Phone 23 —

H. H. Dial was a Calgary vis-
itor last Friday.

H. R. McMurray, of Alnosa,
was a week-end visitor in town.

About Town and Country

Look at your address label.

Mrs. J. C. Desso left last Sat-
urday to visit Mr. and Mrs. H.
Hancock in Edmonton.

Rev. and Mrs. C. R. Corcoran
and family, who have been
spending a vacation in Ontario,
returned to Oyen last Saturday.

Mr. M. J. Mackay, formerly a
resident of this district, whose
home is now in Ontario, arrived
in Oyen last Thursday. Mr.
Mackay expects to spend about
six weeks in the district.

The Acadia U. F. A. Federal
Constituency Association will
hold their annual and non-politi-
cal convention at Hanna, on
Friday, October 2.

Dr. T. R. Whaley, of Alnosa,
was an Oyen visitor last Mon-
day.

Mrs. Affleck recently left for
Biggar, Sask., to visit her son
Allan. She will afterwards go
to Kellogg, to see her brother.

Miss Adele Stewart, who has
been the guest of Mr. and Mrs.
F. L. Aylesworth for the last
ten days, left yesterday for her
home in Edmonton.

J. W. Allen of Edmonton, ar-
rived in Oyen last Friday, and
is spending a few days here re-
newing old acquaintances.

H. J. Diamond, who accom-
panied his son William to Sask-
atoon last week, returned to

Oyen on Thursday. Mr. Dia-
mond reports, at time of going
to press, that his son is making
satisfactory progress.

Miss Agnes Ralsbeck has re-
signed her position on the staff
of the Alberta Government Tel-
ephones, and left Hanna last
Sunday. Miss Ralsbeck has ac-
cepted a position with the Im-
perial Ladies' Orchestra, as
drummer, and left Calgary with
that organization last Monday
on a tour of British Columbia
and the prairie provinces.

We have been fortunate in
securing an exclusive line of
business and personal greeting
cards. Call in and see them.

— The Oyen News.

Commencing on October 1,
the limit on parcels mailed by
Parcel Post will be increased
from 11 to 15 pounds.

Say you saw it in the News.

3 Northern 1.10

OATS

1 C.W.35
2 C.W.32
No. 1 Feed82

Miss Betty Anderson, of Stan-
more, arrived in Oyen last Mon-
day, having accepted a position
on the dining room staff at the
Alberta Hotel.

Rain started to fall this morn-
ing at about 8:30 and continued
steadily throughout the day.
This will cause a two or three
days delay in threshing opera-
tions.

In the office we have a sam-
ple of corn grown at Springdale
Farm (near Sibbald) by Charles
L. Wilson. The stalks stand 9
feet high. For the last few
years Mr. Wilson has grown a-
bout 90 acres each season with
general success. His corn crop
this year is a sight worth see-
ing.

In the coming Federal Elec-
tion which takes place October
29, Col. R. B. Eaton, of Crai-
gville, is the Liberal candidate.
Conservatives and U.F.A. will
select their candidates, Septem-
ber 22 and October 2, respec-
tively.

OYEN SCHOOL DISTRICT
NOTICE

It should be borne in mind
that for the year beginning Sep-
tember 1, 1925, high school fees
for non-resident pupils shall be
at the rate of \$2.00 per month
(or fractional part thereof) per
pupil, payable monthly at the
end of every month.

Such fees to be payable by the
School District if the required
instruction is not available in
the district in which the parent
or lawful guardian resides. If
such instruction is available,
under the written authority of
an Inspector of Schools, the par-
ent or lawful guardian will be re-
sponsible for the payment of the
fees.

CLASSIFIED ADS.
